#### **INFORMATION**

e) S.19/0305/T5DAY Beaudesert Park School, Box, Stroud, Gloucestershire. Wellingtonias on the drive. Following the recent branch failures (one from a historic 'hazard beam' fracture and one a branch free from defects) I recommend the following: (1) First tree on the left closest to the Lodge. Completely remove the lowest 'hooked' limb over the fence and the next 2 branches above this. Reduce the crown spread all round to leave it no longer than 2.5m long from the main stem. Remove / stabilise 6 or 7 branches with possible historic 'hazard beam' fractures. (2) Next tree on the left. Remove / stabilise approximately 9 or 10 branches with possible historic 'hazard beam' fractures.
